
David R. Dugle II

SUMMARY

Currently enrolled in a Full-Stack Developer program at UNCC and am set to graduate in January 2021. Studied front end and back end development in this program. Background is in Transportation and in Sales and am willing to leverage skills obtained in various roles to make a difference.

Projects

Daily Service Record – https://github.com/diminako/daily_service_record

Deployed Link - <https://mighty-spire-89072.herokuapp.com/>

Full-Stack application that uses SQL, Sequelize, Handlebars, Express, JavaScript and Passport. The application tracks Employees hours and allows Managers to keep track of Employees.

Weather Dashboard – <https://github.com/daviddugle/Weather-Dashboard>

Deployed Link - <https://daviddugle.github.io/Weather-Dashboard/>

This application utilizes the Open Weather API to get weather data from selected locations and displays current and five-day weather. The application uses JavaScript, HTML, jQuery and CSS.

Burger Logger – <https://github.com/daviddugle/Burger-Logger>

Deployed Link - <https://intense-garden-63215.herokuapp.com/>

This is a Full-Stack application that uses SQL, Handlebars, Express and JavaScript. This application was an exercise to use SQL to keep track of burgers that the user liked and change the classification rendering appropriately with Handlebars.

Education

UNC at Charlotte Full-Stack Coding Boot Camp

estimated graduation January 2021
