David R. Dugle II

SUMMARY

Full-Stack Developer with a background in Transportation and Management. Experienced in both Front-End and Back-End development with many projects to show technical application. Goals include finding a challenging position to contribute as a team member and grow into an even better Developer.

Projects

Daily Service Record – https://github.com/daviddugle/daily_service_record

Deployed Link - https://mighty-spire-89072.herokuapp.com/

Full-Stack application that uses SQL, Sequelize, Handlebars, Express, JavaScript and Passport. The application tracks Employees hours and allows Managers to keep track of Employees.

- Responsible for Front-End Development
- Responsible for implementation of Handlebars for this application
- Maintained MySQL Database

Weather Dashboard – https://github.com/daviddugle/Weather-Dashboard

Deployed Link - https://daviddugle.github.io/Weather-Dashboard/

This application utilizes the Open Weather API to get weather data from selected locations and displays current and five-day weather. The application uses JavaScript, HTML, jQuery and CSS.

- Managed the third-party API to get the weather forecast using AJAX.
- Dynamically added items to the page using jQuery.
- Added Bootstrap for styling of the page.

Dev-Connect – https://github.com/daviddugle/dev-connect

Deployed Link - https://secret-refuge-67245.herokuapp.com/

This is a Full-Stack application that uses React and Mongo. The application allows users to create a profile and got to a chat room where they can communicate with other developers. The User can update their skills for their profile as well.

- Responsible for authentication through passportJs.
- Responsible for Back-End API calls for data (Create, Read and Update), also useContext to manage state.
- Assisted with implementation of socket.io.
